

## **The Research and Development Cell**

The Research and Development Cell of college organizes workshops on Research Methodology and Statistical Analysis tools like SPSS, MS Excel to empower and encourage faculty members and students for Paper Publication and Presentations in various International and National conferences. It motivates the faculties to participate short term courses and quality development programs. It always encourages them to undergo Ph.D. and guide them in their research development activities. College provides its faculty with duty leave for the presentation of their research activities. It gives full support to research-active faculty members to seek accreditation as a research guide and to conduct and supervise research in their area of their expertise. Teachers motivate the students to present their research work and innovative ideas at Seminars, Conferences and Business Plan Competitions.

The Research and Development Cell makes concerted efforts to create an atmosphere where researchers could use their knowledge, skills, strong governance, and substantial financial support to create and disseminate knowledge, innovate, and develop technologies for societal and industrial requirements.

### **Objectives:**

- 1.To develop research information management system.
- 2.To develop networking and collaborative research of various departments, institutions and university departments.
- 3.To monitor and maintain the integrity and ethics of the research activities of the college departments.
- 4.To build the research capacity of the faculty members and students of the college departments through various activities and the events related to research.
