

Educational trip to Stock exchange

An educational trip was organized for the students of M.Com to stock exchange, Kanpur on 6th Sep, 2019 by the college. Around 30 students participated in this enriching experience. The objective of this visit was to guide the students effectively about the fundamentals and practical application of STOCK TRADING in cash. They got to know about trading in future and option segments through NSE & BSE terminal. The brokers of UP StockExchange associated with NSE & BSE told the students about the method of dealing and trading in securities; the circumstances and causes which influence the market conditions as a result of the fluctuating prices of the securities. The students were also enlightened on the precautions to be taken while trading. The students actually got to know how the economy affects the stock trading and the impact of stock market in economic development of the country. We are grateful to Mr. Amrendra Nath Mishra and Mr. Rohit Malhotra for their valuable time to disseminate information to our students. Needless to say, the visit was a very good learning experience for everyone. Dr. Manisha Gupta and Mr. Anshul Saxena ensured that students gain most in terms of knowledge and experience.
