

Talkative Physics

The STEM Club Department of Physics organized an engaging event on 17 Dec 2022 titled "Talkative Physics" aimed at providing a platform for students to present their understanding of physics topics aligned with the National Education Policy (NEP) curriculum. The event served as an opportunity for students to showcase their learning and communication skills through PowerPoint presentations. Students enthusiastically prepared and delivered PowerPoint presentations on various physics topics. Each presentation was meticulously crafted to convey the depth of understanding acquired by the students over the course of their academic journey. Following each presentation, interactive discussions were facilitated, allowing attendees to ask questions, seek clarifications, and engage in meaningful exchanges with the presenters. Mr Prashant Khare coordinated the event.
